The Handbook for Healthcare is a quality assured national service. It is produced in collaboration with authors and fact checkers who are specialists in their fields.

www.vardhandboken.se

The Handbook for Healthcare ensures equal access to high quality care

The website offers guidelines and instructions, such as:

- ▶ how to perform examinations and tests and give treatment
- ▶ hygiene routines
- ▶ using medical aids and technical healthcare products

Aims and benefits of the Handbook for Healthcare:

- ▶ lower costs and free up resources by reducing the need to issue guidelines, memos, routines and treatment methods locally.
- ▶ give caregivers and healthcare personnel equal access to the most up to date medical knowledge and expertise irrespective of who they are working for or where they are working.
- ▶ support day to day healthcare work, increasing its quality and making healthcare processes more effective.

The Handbook for Healthcare is administered by Inera AB, commissioned by the Swedish Association of Local Authorities and Regions (SALAR). Contact via e-mail: redaktionen@vardhandboken.se
